Good-Natured Statistics – In Everyday Language with Animal Behavior

Authored by Ann Weaver, Ph.D.

ISBN 0615-26663-0. 300pp. Softcover. 2005.

More than 100 photos and illustrations. 5.5" x 8.5".

Dr. Weaver uses statistical analysis in her studies of animal behavior. A scientist, professor, writer and illustrator, she has opened up the world of statistics to her students in layman's terms since 1990. She has studied over 200 species of animals defining similarities between people and animals.

Her in-depth research on dolphins and primates has produced groundbreaking insights that appear in peer-reviewed journals and popular newspaper columns. She currently resides in Florida."

The Statistic Book Students Asked For!!

Do you cringe at the idea of doing statistics? Would you rather do anything else but statistics? "Good Natured Statistics" is for you. It is unique. It explains basic concepts in understandable language with real-world examples and stories about animal behavior. If you have to learn stats but don't want to, this is the book for you!
